Tips to stay safe while ridesharing

Here are some safety tips for passengers when using a rideshare service:

Confirm the name of the driver and make of the vehicle

Check the driver's rating

Share your trip details with friends or family

Avoid riding in the front seat

Follow along in your own maps app

Travel in groups when possible

Trust your gut

If you have an inkling of discomfort or sense something fishy, don't get in the car. If you're already on the road and are in an emergency situation, call 911 immediately.
